

***Volume IV***  
***Responses to Comments***

---

## 1.0 INTRODUCTION

The U.S Coast Guard, the Maritime Administration, and the California State Lands Commission wish to thank the public officials, agencies, organizations, and individuals who attended the public meetings and open houses and/or submitted comments, both oral and written, during the public comment periods for the October 2004 Draft EIR/EIS and the March 2006 Revised Draft EIR.

## 2.0 ORGANIZATION OF THIS VOLUME

The comments and responses are presented in this volume in the following order:

1. Transcripts of October 2004 Draft EIS/EIR public meeting comments and responses.
2. Written comments received during the comment period for the October 2004 Draft EIS/EIR and responses.
3. Statements received during the public comment period for the October 2004 Draft EIS/EIR that express support or opposition to the Project.
4. Transcripts of March 2006 Revised Draft EIR public meeting comments and responses.
5. Written comments received during the comment period for the March 2006 Revised Draft EIR and responses.
6. "Form letter" comments received during the March 2006 Revised Draft EIR public comment period and the response. An identical letter was sent by 172 people. The letter is reproduced once; however each person who sent this letter is identified.

## 3.0 GUIDE TO TEXT CITED IN THE RESPONSES

The responses in this volume often refer the reader to chapters or sections where the information can be found that is germane to the comment. Unless stated otherwise, the responses refer to the text of the Final EIS/EIR (Volumes I, II, and III of this document). Section numbers cited in the responses refer to all the material within that section, including subsections. For example, a reference to Section 1.2 includes all of the subsequent text until the start of Section 1.3.

## 4.0 COMMENTS RECEIVED

The public comment period for the October 2004 Draft EIS/EIR began November 5, 2004, and ended on December 20, 2004. During that period, approximately 676 persons attended the public meetings and open houses in November and December 2004 in Santa Clarita, Oxnard, and Malibu, and 195 people gave oral comments at these meetings. In addition, USCG and CSLC received more than 500 electronic-mail messages, postcards, and letters on the October 2004 Draft EIS/EIR from elected officials, agencies, organizations, and private citizens.

1 The public comment period for the March 2006 Revised Draft EIR began March 13,  
2 2006, and ended May 12, 2006. During that period, more than 1,000 persons attended  
3 the public meetings in April 2006 in Santa Clarita, Malibu, and Oxnard, and 214 people  
4 gave oral comments at these meetings. In addition, USCG and CSLC received more  
5 than 500 electronic-mail messages, postcards, and letters from elected officials,  
6 agencies, organizations, and private citizens on the March 2006 Revised Draft EIR.

## 7 **5.0 CONSIDERATION OF ALL COMMENTS**

8 All comments on the environmental effects of the proposed Project that were received  
9 during the two public comment periods, and responses to such comments, are  
10 published in this volume, as well as are statements that express either opposition to or  
11 support for the Project, which do not require a response. Oral comments and written  
12 comments have been given equal consideration. All comments are part of the public  
13 record and will be taken into account by decision-makers when they consider the  
14 proposed Project.

## 15 **6.0 HOW TO USE THIS CD TO FIND THE RESPONSES TO YOUR** 16 **COMMENTS**

### 17 Public Hearing Transcripts

18 To find responses to comments you made orally during one of the public hearings, first  
19 use the index to select the meeting at which you spoke. Then click on the link for the  
20 transcript number to go directly to that transcript. Each transcript has an index of  
21 speakers in bookmark form. Click on the bookmark for your name to go to the place in  
22 the transcript with your comments and the responses.

### 23 Letters

24 Letters are organized by Federal, State, and local government letters, followed by  
25 letters from the general public. Letters from the general public are organized  
26 alphabetically by the last name of the person who signed the letter. If more than one  
27 person signed a letter, the index generally lists only the first person who signed it. Use  
28 the index to find your name, then click on the letter number to see your letter and the  
29 responses.

## **2006 LETTERS - FORM LETTER**

---

During the March 2006 Revised Draft EIR public comment period, 172 people submitted an identical "Form letter." The letter is reproduced once with responses on the following pages. Following the letter and responses is a list of the names of the people who submitted this form letter. Click on your letter number to see your letter.

April 19, 2006

Dwight Sanders  
State lands commission,  
100 Howe Avenue  
Suite 100 South  
Sacramento California 95825-8202

Re: Stop Cabrillo Port LNG

Dear Mr. Sanders,

Please stop Cabrillo port LNG industrial plant from progressing any further in the permit process. California law prohibits industrial intrusion on highly scenic areas. The last remaining wild areas on the Southern California Coast will be permanently despoiled if this industrial plant is installed. In fact over 10 national parks, national recreation areas, state, city and county parks will be despoiled. This would forever impact the quality of life of the areas residents and negatively impact the millions of visitors who come to hike and enjoy the seashore. In addition, federal and state governments own studies show that this project would:

- result in both short term and long term adverse impacts to the coast and it's residents.
- Increase smog levels (tons of pollutants spewing directly upwind from our houses, beaches and hiking trails.
- contain 14 story high pollution spewing industrial towers with lines of support ships which forever will be our new horizon. This towers will be brightly lit at night being a 24 hour eye sore .
- harbor the possibility of a 14 mile wide explosive flash fire due to an accident of terrorist attack.
- be visible from all elevations in malibu from downtown Malibu all the way to Port Hueneme.
- require a "security zone" of 2.3 miles around it. (to protect from terrorism, accidents etc) which is in the same shipping channel where 10,000. container ships and oil tankers use annually.

There are many more negative impacts than the above "official" ones disclosed by the federal and state study.

PLEASE do not allow this to go forward. We, the citizens of Southern California will fight this project until it is derailed. Our money and time can be spent on projects that truly will improve the quality of life in Southern California rather than just provide an opportunity for foreign Companies to sell us gas that they and we do not need.

Sincerely,

1

1

Section 4.4 contains information on the visual aspects of the Project, potential impacts, and measures to address such impacts. See Impact AES-1 in Section 4.4.4, which states, "[t]he FSRU would appear similar in shape to commercial vessels that are frequently seen in the Project area." Table 4.3-1 contains information on the numbers and representative sizes of vessels that are commonly found in the proposed Project area, and Appendix F contains additional simulations.

2

Figure 2.1-2 shows the locations of selected existing offshore industrial facilities and activities, including the coastwise traffic lanes, in relation to the proposed Project. Table 4.3-1 contains information on the number and representative sizes of vessels transiting the Project area. The FSRU would be removed at the end of its in-service life (40 years), as discussed in Section 2.8.1.

3

Section 4.15.4 contains information on potential impacts on recreational activities. The FSRU is not located in or near any park or recreational area. The boundary of the Channel Islands National Park is more than 17 NM away at its closest point on Anacapa Island. Table 2.1-2 contains additional information on distances from the FSRU to points-of-interests and the potential expansion of the CINMS. The Santa Monica Mountains National Recreation Area is more than 12 NM away from the FSRU, as are all other State parks and recreations areas. The only recreational facility crossed by the proposed onshore pipelines is the multi-use trail along the South Fork Santa Clara River in Santa Clarita, which would be temporarily affected during construction but restored afterwards. Appendix F contains additional view simulations from recreation areas.

4

Chapter 6 contains information on impacts and mitigation analyzed for the proposed Project. Section 4.20 contains information on the cumulative effects of the proposed Project.

5

The Project has been modified since issuance of the March 2006 Revised Draft EIR. See Section 1.4.2 for a summary of Project changes. Section 4.6.1.3 contains revised information on Project emissions and proposed control measures. Section 4.6.4 discusses the health effects attributed to air pollutants and includes revised impacts and mitigation measures.

6

Figure 2.2-1 shows the height of structures above the loaded waterline, which is also discussed in Section 4.4.1.1.

7

The projected FSRU in-service life is a maximum of 40 years.

8

Section 4.4.1.1 contains information about the visual aspects of the Project, including lighting at night. Impact AES-2 also discusses night lighting on the FSRU. Section 4.3 contains information on marine traffic associated with the proposed Project. Up to two LNG carriers would call on the FSRU weekly. Under normal operating conditions, the carriers would not be closer to shore than the FSRU, which is located farther from shore than the coastwise traffic lanes. Figure 4.3-9 shows LNG carrier approach routes. Up to six additional transits by service vessels would occur weekly between the FSRU and Port Hueneme, using the routes shown in Figure 4.3-15.

9

The Independent Risk Assessment (IRA), which was independently reviewed by the U.S. Department of Energy's Sandia National Laboratories, evaluates the consequences of a potential vapor cloud (flash) fire, as discussed in Section 4.2.7.6 and the IRA (Appendix C1). The IRA determined that the consequences of the worst credible accident involving a vapor cloud fire would be more than 5.7 NM from shore at the closest point, as summarized in Table 4.2-1. Figure 2.1-2, Consequence Distances Surrounding the FSRU Location for Worst Credible Events, depicts the maximum distance from the FSRU in any direction that could be affected in the event of an accident. The shape and direction of the affected area within the circle depicted in Figure 2.1-2 would depend on wind conditions and would be more like a cone than a circle, but would not reach the shoreline.

10

See the response to Comment P241-1.

11

The safety zone would extend in a circle a maximum of 500 meters from the stern of the FSRU. The area to be avoided (ATBA) would surround the safety zone, but would not extend as far as the coastwise traffic lanes (see Figure 4.3-4 and Sections 2.2.4 and 4.3.1.4).

Section 4.3.1.4 states, "The ATBA is considered by the USCG to be

a recommendatory routing measure. Mariners could choose whether to avoid this area. Mariners would not be penalized for entering this area, nor would any action be taken to require them to leave the area. A vessel transiting the ATBA would be requested to restrict its speed to no more than 10 knots (19 km/hour) and to check in and out with the Cabrillo Port vessel operations manager. Both the speed limit restriction and contact with the Cabrillo Port vessel operations manager would be voluntary actions by mariners in vessels transiting the ATBA." Therefore, vessel traffic in the traffic lanes would not be affected by the safety zone or the ATBA (see Section 4.3.4). The safety zone could not be made any larger because its size is governed by international law.

12

See the response to Comment P241-7. The lead agencies have sought to identify (see Sections 1.4 and 1.5 and Appendix C) and evaluate all known and potential environmental impacts of the proposed Project.

13

Your statement is included in the public record and will be taken into account by decision-makers when they consider the proposed Project.
